PROFESSIONAL SUMMARY

Passionate DevOps Engineer with extensive experience in automating, optimizing, and maintaining modern infrastructure. Expertise in implementing CI/CD pipelines, container orchestration, and cloud infrastructure management. Strong foundation in bridging the gap between software development and IT operations to deliver efficient, scalable, and reliable solutions.

WORK EXPERIENCE

DevOps Engineer

2023 - Present

PT. Indodev Niaga Internet

- Implemented and managed Kubernetes clusters for microservices architecture
- Reduced deployment time by 70% through CI/CD pipeline optimization
- Architected cloud infrastructure on Cloud and On-premise Infrastructure

IT Infrastructure

2021 - 2023

PT. Gogomedia Visiondo

- Designed and implemented high-availability server infrastructure serving 100+ clients
- Orchestrated migration of legacy systems to modern cloud infrastructure
- Established monitoring systems using Zabbix and Grafana, improving incident response time by 60%

IT Support

2018 - 2020

PT. Wellcomm Ritelindo Pratama

- Managed and maintained IT infrastructure for 50+ retail stores across Indonesia
- Reduced system downtime by 40% through proactive monitoring and maintenance
- Implemented backup and disaster recovery solutions for critical business systems

KEY PROJECTS

Retail IT System Modernization

Led the modernization of retail IT systems across 50+ stores, implementing centralized monitoring and automated backup solutions.

Windows Server SQL Server Backup Systems

Server Migration & Monitoring

Designed and executed migration of legacy infrastructure from physical server to Proxmox VM, implementing comprehensive monitoring using Zabbix.

Proxmox Zabbix Linux

DevOps Pipeline Automation

Built and optimized CI/CD pipelines using Jenkins and Docker, reducing deployment time and improving application reliability.

Jenkins Docker Kubernetes

TECHNICAL SKILLS

Docker

Kubernetes

Jenkins

Ansible

ArgoCD

AWS Cloud

Linux

Windows Server

Proxmox

Zabbix

Grafana

HAProxy

Nginx

SQL Server

MariaDB
